

Herz Fig No 4217GML

Screwed VODRV partner valve from DN15 – DN50 shall be DZR Copper Alloy, to BS7350, rated PN16, Globe pattern and have a non-rising spindle with a double O-ring spindle seal and soft seat for positive shut off. Pre-setting shall be by limitation of spindle lift with pre-set value displayed digitally through a window in the hand wheel. Valves shall have locking and marking facilities for the pre-setting and be fitted with special self-sealing test points to allow measurement of the pressure drop across the variable orifice to determine the flow rate. The downstream test point should also have a capillary connector to facilitate the connection of the DPCV capillary. The valve manufacturer shall provide a five year fully comprehensive warranty, covering parts, labour and consequential loss.
