

Herz Fig No 4218CS

Flanged fixed orifice commissioning sets, DN65 – DN300 shall comprise of a Double regulating valve close coupled to an orifice plate. The valve shall be straight pattern and have a non-rising spindle with an EPDM coated parabolic disc. Pre-setting shall be by limitation of spindle lift with pre-set value displayed on the hand wheel. Valves shall have locking and marking facilities for the pre-setting. The stainless steel orifice plate shall be to BS7350 and fitted with self sealing test points for flow verification. Valves must be sized for the flow rate required for each application, rated PN16
