

Fig No 4600-2x

A pre-assembled unit supplied within an insulated box, comprising of a ball valve & strainer on the flow side, a commissioning valve on the return side and also a flushing bypass complete with ball valve. The commissioning valve will have hidden preset facility incorporating a memory stop feature. The unit must be configured to allow forward & reverse flushing. The ball valves will have integral extended levers to facilitate lagging and maintain a vapour seal during operation. Valves must be sized for the flow rate required for each application, low and medium flow versions will be available. Rated PN16. The valve manufacturer shall provide a five year fully comprehensive warranty, covering parts, labour and consequential loss.
